Come with us to see the flight demonstration program, which is the highlight of a visitor's experience at the Center for Birds of Prey! Seeing hawks, falcons, owls, eagles, kites and vultures perform their natural flying and hunting techniques provides a fascinating insight into their unique evolutionary adaptations.

Following the program and flight demonstration, we will enjoy touring the center to learn more about key bird species and view attractive aviaries that house other birds of prey from all parts of the world.

With nearly 50 species represented, the Center's collection is one of the largest, and most diverse, in the United States.
